## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed "computer readable medium" is non statutory **signal claim** in view of the specification (Page 26) that reads the computer readable media as a 'communication media that includes electrical, optical, RF, infrared, acoustic or other carrier signals'.

## Allowable Subject Matter

Claims 1-6, 10-14 and 16-17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-6 and 10-13 are allowed for same reason provided previously. Claims 14 and 16-17 are allowed because the prior arts of record do not teach the added limitation including the step of applying a lapped transform and its inverse on the windowed frame comprises performing a matrix multiplication with the windowed frame.
